A woman in a dark dress is lifting a young child into the air in a large, open grassy field. The scene is set under a large, leafy tree with green and yellow leaves, suggesting a sunny day. The background shows a line of trees and a clear blue sky.

THE GENTLE REVOLUTION PRESS™

GLENN DOMAN has strongly influenced millions through his groundbreaking series of books and materials that help parents teach their babies at home.

Dear Parents,

I'M DELIGHTED that you have in your hand the Gentle Revolution Press catalog. Each book described here contains not only the instructions on how to teach your baby to read or learn math or gain encyclopedic knowledge, but every bit as important is the fact that it contains why you should teach your baby to read or learn math or gain encyclopedic knowledge, and what will happen as a result.

That means that you must be certain to read each book very carefully before you begin.

Millions of parents have read our books and enjoyed them vastly, and I'm sure that you will too. We recommend that both mother and father read the books.

We have received thousands of letters from parents the world over telling us of their success with the books and asking brilliant questions. These letters arrive every day.

These letters are the greatest body of evidence that not only is it possible for tiny children to learn anything and everything, but when a child does so at an early age it is one of the most important things that will ever happen in the child's life.

These vital points are essential in teaching babies and young children.

1. Teach joyously.
2. Go very quickly.
3. Applaud your child's success enthusiastically.
4. Never test your child.

When you teach joyously you can't lose. Teaching your baby will not only add to your love for each other but will multiply your respect for each other.

You are about to begin one of the most exciting and wonderful times of your life, and I will not keep you from it any longer.

Have a glorious time together.

With love and respect,
Glenn

P.S. If you have anything you'd like to tell me or ask me after you've gotten started, feel free to write to me care of The Institutes. I'm always delighted to add to my treasury of letters from parents.

"Every child born has, at the moment of birth, a greater potential intelligence than Leonardo da Vinci ever used."

*The Institutes for the Achievement
of Human Potential®*

An
Open Door
to the World's Parents
and Their Children

THE INSTITUTES FOR THE Achievement of Human Potential is a nonprofit, federally tax-exempt educational organization that has been serving children and teaching parents from around the world since 1955.

The goal of The Institutes is to significantly raise the ability of all children intellectually, physically, and socially. The Institutes accomplishes this goal by teaching parents how to create an enriched environment at home, where they can teach their children in a relaxed and happy way.

The Institutes work began with brain-injured children, many of whom had been diagnosed with cerebral palsy, autism, developmental delay, Down syndrome, learning problems, and a host of other symptomatic labels. In order to find new solutions for these children, the new field of child brain development was created.

As new methods were discovered, the hurt children being seen at The Institutes began to improve. A significant number were even able to catch up and go beyond their well peers intellectually, physically, or socially. This clearly demonstrated that hurt children were not hopeless, as previously had been assumed, but instead could be helped. It also proved that well children were not as well as they ought to be.

The Institutes has spent over half a century pioneering new ways of making all children more capable and more confident. Today The Institutes is internationally known for its pioneering work on behalf of hurt children and its Gentle Revolution to help all children achieve excellence.

The Institutes has been privileged to visit and study children in some of the most primitive places on earth and in some of the world's most sophisticated capitals.

Situated on 15 rolling acres in Wyndmoor, Pennsylvania, The Institutes for the Achievement of Human Potential offers an ideal setting for parents to take an active role in their children's education. It was the work of The Institutes with brain-injured children and their dedicated parents that prompted the development of joyful learning tools for all children.

THE BOOK that started the Gentle Revolution was *How To Teach Your Baby To Read*. When it first appeared it not only created quite a sensation but it helped to unleash the creativity of parents. The first thing every parent learns is that when you start to teach your baby, the baby wants more and he wants more *right now*. Meeting that demand has not been easy, but it has been the right problem to have because it means we are doing something right.

We began by creating reading materials to help parents get started. Then we needed *Bit of Intelligence* cards and Math Dot cards. Now we know that we can never really make enough teaching materials to keep up with our kids, but we keep trying.

The mission of the Gentle Revolution Press is to create, publish, and distribute the highest-quality materials and books of The Institutes for the Achievement of Human Potential.

The Gentle Revolution Press donates its modest profits to the work of The Institutes. You can be assured that you will have the very best materials for your baby, made exactly as they should be, and that everything you purchase will help to support the work of The Institutes to make a better world for all children.

On the order form, you can make a donation directly to The Institutes. This will support their work even further.

If you would like to order something or just ask a question, we are here to help you promptly, cheerfully, and courteously. Our job is to save you time so that you can spend as much time as possible nose-to-nose with your kids.

You will find that you and your child are the most dynamic teaching and learning team that there is. You will learn so much from each other.

The programs of The Institutes, and the methods and materials used to implement them, are the result of daily experience with more than twenty-five thousand children and their parents.

The Institutes for the Achievement of Human Potential has branches in Rio de Janeiro, Brazil; Kobe and Tokyo, Japan; Fauglia, Italy; and Aguascalientes, Mexico. These are the only branches of The Institutes. The world headquarters of The Institutes is outside of Philadelphia, Pennsylvania, U.S.A.

The Institutes is funded by tuitions and donations.

Nurture Your Smart Newborn

Learn how to measure and enrich your baby's first year of life

How Smart Is Your Baby?

AN ESSENTIAL GUIDE to measuring and enriching your baby's first year of life.

This book is about the potential of the newborn baby and the vital role that parents play in developing that potential. It guides parents in evaluating their baby's development and in creating an effective and balanced daily program for physical and intellectual growth.

• Hardcover, 266 pages (0301)

“This book is an inspired guided tour of the first twelve months of brain growth and development.”

Denise Malkowicz,
M.D., Neurologist

THE BOOK COVERS:

- How to create a developmental profile for your baby
- How to evaluate the sensory and motor pathways
- How to develop the sensory and motor pathways
- The importance of mobility to the baby
- The importance of intellectual stimulation
- Language development dos and don'ts
- How to teach joyously
- Daily checklists
- Materials and equipment needed

The Glenn Doman®

Your Smart Baby Newborn Programs

THE BASIC PROGRAM

THIS PROGRAM, designed for use with the book *How Smart Is Your Baby?*, contains the materials you need to develop and nurture your newborn's full potential. It contains essential materials needed for enriching your baby's first year of life. (SBPB)

BASIC PROGRAM INCLUDES:

- Two 34" x 27" black-and-white checkerboard posters
- Two 34" x 27" checkerboard posters with color detail
- Five face cards
- 21 outline cards
- 10 dot cards
- 21 detail cards
- 10 color fruit cards
- 10 black word cards
- 22 red word cards

THE CLASSIC PROGRAM

THIS PROGRAM contains all of the materials in the Basic Program, PLUS the softcover book *How Smart Is Your Baby?* (SBPC)

ASICS® Infant Crawling Track

THE ASICS INFANT CRAWLING

TRACK is a perfect environment for beginning your baby's mobility development. It is constructed of yellow and green polyethylene foam and folds in half for portability and storage. When opened, it measures 19" (49 cm) wide / 6.7"

(17 cm) high / 46.5" (109 cm) long. This

item is **NON-RETURNABLE**. Telephone orders only. Call for shipping costs. (5129)

Teach Your Baby To Read

...with books and teaching tools that bring parents and babies closer together

How To Teach Your Baby To Read

READING IS NOT A SUBJECT

like geography. As Glenn Doman clearly points out, reading is a function of the brain, like seeing or hearing. This book shows just how easy and fun it is to teach a tiny child to read. Fascinating case histories explain the benefits of early reading for both parents and children. Give your child the gift of literacy. Enjoy the classic book that for over forty years has brought parents and babies closer together. Through this book, millions of parents have given their children an incredible advantage through an early ability to read. • Hardcover, 262 pages (0201-40)

*Complete Glenn Doman® learn-to-read programs give you everything you need to start your baby on the road to really **READING!***

DVD...with practical demonstrations by parents and children.

Glenn Doman, Janet Doman and Susan Aisen share their insights and explain the “whys” and “how-tos” of teaching your baby to read. It will be a wonderful reference for years to come. • 72 minutes (0819)

The Glenn Doman®

How To Teach Your Baby To Read™ Programs

THE BASIC PROGRAM

This program is for parents who have already purchased a copy of the revised and updated book *How To Teach Your Baby To Read*.

This program contains:

- Large reading word cards (75 single word cards, 27 couplet cards, 13 phrase cards, and 5 sentence cards) all leading up to your child's first book
- *Enough, Inigo, Enough*, a full-color, high-quality, hardcover book
- Certificate of Achievement to award on the day your baby reads his first book. (0401)

THE CLASSIC PROGRAM

Contains the Basic Program plus the revised softcover book *How To Teach Your Baby To Read* (0402)

THE DELUXE PROGRAM

Contains the Classic Program plus the 72-minute DVD of *How To Teach Your Baby To Read* (0404DV)

BOOKS FOR BEGINNING READERS

Nose Is Not Toes This charming book combines familiar rhyming words with a story about all sorts of interesting creatures. The book contains extra-large print so it can be read easily by very young readers. It also provides a complete vocabulary list to assist parents with instruction. Written by Glenn Doman and illustrated by Janet Doman.

- Hardcover, 143 pages (0211)

Enough, Inigo, Enough Designed to be read by two- and three-year-old children. This book illustrates the life and times of Inigo McKenzie and his insatiable desire to learn more about his world. Written by Janet Doman. • Hardcover, 58 pages (0220)

Teach Your Baby Math

as easily as teaching your baby how to read with this fun, yet proven, math-learning system

How To Teach Your Baby Math

WHEN HOW TO TEACH YOUR BABY TO READ™ SOLD over

one million copies, a great many parents who had successfully taught their children to read asked Glenn Doman, “How do I teach my baby math?” It took ten years of research to find the answer. This book provides parents with a simple and clear daily program for teaching small children mathematics. As is the case with reading, mathematics is not an academic body of knowledge but rather another language in which to think and reason. The authors show clearly just how easy it is to teach a young child the reality of quantity and the simple truth behind the symbols we use in mathematics.

• Hardcover, 242 pages (0207)

“If you teach a tiny child the facts about math, he will discover the rules.”

Glenn Doman

DVD... Develop your baby’s enthusiasm for math. Glenn and Janet Doman and Susan Aisen instruct parents in the basic principles of teaching a tiny baby mathematics. Everything you need to begin is covered, including how to develop and expand the program. This informative video shows you how to organize teaching materials and how to develop your baby’s natural enthusiasm for math. Delightful demonstrations by mothers and babies show that good teaching and joy go hand-in-hand. • 55 minutes (0820)

The Glenn Doman[®]
**How To Teach Your Baby
Math[™] Programs**

THE BASIC PROGRAM

This program is designed for those who already have the revised and updated book *How To Teach Your Baby Math*.

This program contains:

- Dot Cards[®] 0 to 100 on 11" x 11" sturdy poster board. Each card has up to twenty-eight equations on the back. They save precious time and energy and allow parents more teaching time and less time spent using a calculator. (0410)

Contains the Classic Program plus the 55-minute DVD of *How To Teach Your Baby Math* (0413DV)

Give Your Baby Encyclopedic Knowledge

*and a life-long love of learning
and an enthusiasm for knowledge*

How To Give Your Baby Encyclopedic Knowledge

IMAGINE A TWO-YEAR-OLD'S DELIGHT if he were able to recognize an owl in a tree, a bee on a sunflower or a painting by van Gogh. This exciting book presents to parents the revolutionary idea that children are far more intelligent than we had ever dreamed.

In fact, we have been wasting our children's most important years by refusing to allow them to learn at the time when it is easiest to absorb new information.

Glenn Doman and co-authors Janet Doman and Susan Aisen show parents how to take advantage of those early developmental years, when a child's ability to learn is limitless. They present a step-by-step program that enables parents to create a joyous and productive learning environment at home. • Hardcover, 282 pages (0204)

DVD...Helps you build and develop this program. This informative video shows parents how children learn and the best methods for enriching your child's learning environment. Glenn and Janet Doman, along with Susan Aisen, present step-by-step instruction to help parents build a program that will enable their children to better utilize their learning potential. Demonstrations from mothers and children show the joy and ease of learning together at home. • 60 minutes (0821)

The Glenn Doman[®]
**How To Give Your
Baby Encyclopedic
Knowledge™ Programs**

*Teach your child
virtually anything
—in an honest, joyous way—
with the Encyclopedic
Knowledge Program.*

THE BASIC PROGRAM

Used successfully by parents and grandparents to increase their baby's understanding of the world around them. This kit is designed for those who already have the *How To Give Your Baby Encyclopedic Knowledge* book.

This program contains:

- Five categories of Bit of Intelligence[®] cards with ten cards in each category and ten key facts on the back of each one (0422)

THE CLASSIC PROGRAM

Contains the Basic Program plus the softcover book *How To Give Your Baby Encyclopedic Knowledge* (0423)

THE DELUXE PROGRAM

Contains the Classic Program plus the 60-minute DVD of *How To Give Your Baby Encyclopedic Knowledge* (0424)

The Encyclopedic Knowledge Program gives your child:

- A life-long love of learning
- A respect for knowledge for its own sake
- A broader and richer vocabulary
- Enhanced language development
- Increased sensitivity to surroundings
- The ability to use information to solve problems
- The ability to relate different areas of knowledge to each other and to draw conclusions
- An enthusiasm for teaching others

Bit of Intelligence®

EACH BIT OF INTELLIGENCE card in the Encyclopedic Knowledge Series is an 11" x 11" full-color illustration or photograph. It is printed on sturdy board and made to last. These cards are packaged according to specific areas of knowledge and come in sets of ten. The reverse side of each card contains ten fully researched facts.

Kids Who Start Ahead, Stay Ahead By Dr. Neil Harvey

THIS BOOK EXAMINES the unique experiences of more than three hundred pre-schoolers who were taught at home before entering mainstream educational institutions. Did preschool home-learning have an effect on the children's classroom performance, social life or behavior?

Dr. Harvey asked parents of these early learners how the children fared academically, physically and socially once they entered school. With our own educational system ranking near the bottom among industrialized nations, it is time we understand that children who start ahead, stay ahead!

- Softcover, 176 pages (2055)

Teach Your Child To Be • Physically

How To Teach Your Baby To Be Physically Superb

*Improve your baby's mobility,
intellectual development, health and
overall well-being.*

GLENN DOMAN, Douglas Doman and Bruce Hagg propose that we may be wasting our children's most important years by not allowing them to explore physically their world and

improve their mobility development when it is easiest for them to do so. What's more, the early development of mobility in newborns is a vital part of their future ability to learn and grow to full potential. The authors show clearly each stage of mobility and how to create an environment that will help your baby to achieve that stage more easily. Full-color charts, photographs, illustrations and precise, detailed, yet easy instructions help parents create their own home program.

This inspiring book shows that the team of mother, father, and baby exploring and discovering together the joys of human mobility—from crawling to gymnastic skills—will be your baby's most important athletic team. • Hardcover, 296 pages (0206)

DVD...Explains the basic stages of mobility development. Starting with a basic physical program for a newborn baby, Glenn and Douglas Doman show mother and father how to create a home environment that will enhance and improve their baby's crawling, creeping, and respiration, their toddler's walking and running, and their two- and three-year-old's balance and coordination. Included are delightful demonstrations of each stage by

children and their mothers and fathers. • 85 minutes (0816)

“The right to be physically superb is a birthright.”

Superb

How To Teach Your Baby To Swim

WITH MORE THAN 160 PHOTOGRAPHS, this book presents detailed instructions on all the core skills necessary to swim properly, including breath control, kicking, and submersion. All of these skills come together as you teach your baby to dive, float, and swim—both on and under the water. • Hardcover, 120 pages (0303)

Waterproof Swimming Program Checklists

THE BOOK *How To Teach Your Baby To Swim* contains seven checklists.

Each checklist summarizes the contents of the chapter and a specific swimming program. These checklists have been made into convenient-size plastic cards and are attached to a comfortable wristband that parents can wear in the water. Parents can use the card to remember all the activities for each swimming session. A Water Safety and Hygiene checklist is included. (SWIM CARD)

experience and knowledge.

What To Do About Your Brain-Injured Child

“The true and touching story of the efforts of an obviously highly educated group of workers who believe thoroughly in what they are doing.. and have unquestionably helped many children and their families.”

Louise B. Ames, The Gesell Institute For Child Development

IN THIS BREAKTHROUGH BOOK, Glenn Doman—pioneer in the treatment of mentally retarded, mentally deficient, cerebral-palsied, epileptic, autistic, athetoid, hyperactive, attention deficit disorder, developmentally delayed, and Down’s children—brings hope to thousands of children, some of whom are inoperable, and many of whom have been given up for lost and sentenced to a life of institutional confinement. Based upon the decades of successful work performed at The Institutes for the Achievement of Human Potential[®], the book explains why old theories and techniques fail, and why the philosophy and revolutionary treatment of The Institutes succeed.

In this book, the author discusses the staff’s lifesaving techniques, as well as the tools they use to measure and ultimately improve visual, auditory, tactile, mobility, language, and manual development. Glenn Doman explains the unique methods of treatment that are constantly being improved and expanded. He then describes the program that enables parents to treat their own children at home in a familiar and loving environment. Included throughout are case histories, drawings, charts, and diagrams.

Twenty thousand families from over a hundred nations have brought their children to The Institutes. The great majority of these children have done better than their parents had hoped, when measured against their prior experience with conventional methods. For each of these families, this book was the starting point. • Hardcover, 318 pages (0219)

Give Me My Voice

Poems Written by Brain-Injured Children

Edited by Janet Gauger

This anthology contains poems written by thirty children on The Institutes program. These children are able to express their thoughts eloquently and poetically. This beautiful book will astound and touch all who read it. • Softcover, 68 pages (0280)

Courses

PRESENTED BY *The*

How To Multiply Your Baby's Intelligence®

“The best investment I will ever make for my daughter.”

Caroline Gilbert, M.D.,
Paris, France

Start Your Child on the Road to Success

Parents come from all over the world to The Institutes for the Achievement of Human Potential to learn how to significantly increase the intellectual, physical, and social abilities of their children. *How To Multiply Your Baby's Intelligence* is a comprehensive course designed to provide mothers and fathers with the essential information they need to create an enriched home environment for their children.

PARENTS ARE THE BEST TEACHERS

No one knows your child or loves your child as much as you do. You are the best and most beloved teacher your child will ever have. Babies do not arrive with instructions. Mothers and fathers need to know what to do to help their babies and how to do it. When parents understand how easy it is to teach their baby, and how important it is to the baby's well-being, the whole family becomes closer and happier.

WHAT PARENTS SAY

“My son is 14 months old and he is learning how to read and do math. I can't tell you how pleased I am.”

Mrs. Penny Fraser, Florida

“Thank you for teaching us how to allow our children to be their best.”

Ms. Mary Bernick, Pennsylvania

CHILDREN CAN LEARN ANYTHING

Children would rather learn than do anything else. They want to learn everything, and they want to learn right now. Mothers and fathers learn how to teach in a joyous and relaxed way.

■ **TO ENROLL**, contact The Institutes® at (800) 344-6684 or (215) 233-2050, or e-mail htm_registrar@iahp.org.

What You Will Learn

■ **Reading** *Learn how to teach your baby to read joyously. Give your baby the gift of literacy and watch your child become a bookworm, not a TV bug.*

■ **Encyclopedic Knowledge** *Shouldn't our children know the birds and the insects in their own backyard, or enjoy the beauty of a Picasso or a van Gogh?*

■ **Math** *Babies love learning about the language of mathematics, because they are natural mathematicians. Even adults can learn to love math through their babies!*

■ **Physical Ability & Nutrition** *Physical development is an essential part of intellectual development and physiological well-being. Physical and physiological excellence are key to all aspects of development throughout life.*

■ **Music & Foreign Language** *Learn how Bach, Beethoven, and Mozart can be your baby's first music teachers. Learn how you can help your child to be bilingual, even if you are not!*

For More Information

for Parents

Institutes for the Achievement of Human Potential

What To Do About Your Brain-Injured Child®

“This course is a supernova of hope and opportunities.”

Martin Holst,
Denmark

Unlock The Potential in Your Child

What To Do About Your Brain-Injured Child is a comprehensive course that provides parents with vital information on how to significantly increase their child’s mobility, intelligence, and social growth, and to improve their health and physical growth.

PARENTS ARE THE BEST THERAPISTS

The Institutes strongly believes that children do best at home with their mothers and fathers. When parents know how to provide an ideal environment for brain growth, they are the best teachers for their child. When the family learns how to work as a team, parents can achieve significant results. The family is the answer—not the problem.

What You Will Learn

■ **About the Brain** *Learn what brain injury is, what causes it, and the range of brain injury. Understand how the brain grows and how it can be stimulated to grow faster.*

■ **About Evaluation** *Learn how to evaluate your child in the six critical areas of human function, resulting in a clear, functional developmental profile.*

■ **About Mobility** *Mobility is essential to all aspects of brain growth. Parents learn how to create the ideal mobility program for their child.*

■ **About Physiology** *Understand why children have chronic illness and problems with eating, sleeping, breathing, allergies, seizures, or behavior. How to solve these problems is a vital part of the course.*

■ **About Intelligence** *Children have enormous intellectual potential. Parents learn how to teach effectively and how to learn side-by-side with their child.*

WHAT PARENTS SAY

“I learned incredible information on how to grow my son’s brain to give him a good chance at a rich fulfilling life.”

Mr. Jim Campbell, Canada

“The course was even better than I expected. This was one of the best weeks of my life because I’m now equipped with the knowledge to make my son well.”

Mrs. Jodi Kukla, USA

IS YOUR CHILD A CANDIDATE?

Children may have been diagnosed with cerebral palsy, autism, Down syndrome, developmental delay, attention deficit disorder, hyperactivity, or learning problems.

The Institutes treats the full spectrum of children—from those who are blind, deaf, paralyzed, insensate, and speechless to those who have learning problems.

■ **TO ENROLL**, contact The Institutes at (215) 233-2050 or (800) 736-4663, or email wtd_registrar@iahp.org.
