

MAJOR VICTORIES

Achieved by **3393** Brain-Injured Children • **1998-2018**

SEEING

Of the **416** children who were blind, **350 (84%) saw for the first time** and **296** children learned to read. (They ranged in age from 8 months to 22 years 1 month.)

HEARING

Of the **172** children who were deaf, **144 (83%) heard for the first time.** (They ranged in age from 8 months to 22 years 1 month.)

UNDERSTANDING

Of the **1,514** children whose comprehension was not yet equal to that of the average three-year old, **1,340 (88%) achieved this level of understanding for the first time.** (They ranged in age from 15 months to 32 years 3 months.)

CRAWLING

Of the **1,283** children who were unable to move, **514 (40%) crawled for the first time.** They went from being paralyzed to being able to crawl across a room. (They ranged in age from 8 months to 22 years 10 months.)

CREEPING

Of the **619** children who were unable to creep, **402 (64%) began to creep for the first time.** This is to say that they defied gravity to move to the third dimension and now get all over the house on hands and knees. (They ranged in age from 7 months to 21 years 6 months.)

WALKING

Of the **652** children who were unable to walk, **352 (54%) began to walk without help** for the first time. (They ranged in age from 14 months to 23 years 8 months.)

RUNNING

Of the **787** children who were able to walk but not run, **399 (50%) learned to run for the first time.** (They ranged in age from 30 months to 25 years 8 months.)

READING

Of the **1,916** children who were unable to read, **1,856 (96%) read for the first time.** (They ranged in age from 8 months to 32 years 3 months.)

TALKING

Of the **1,570** children who were unable to speak, **665 (42%) spoke for the first time.** (They ranged in age from 16 months to 21 years 4 months.)

WRITING

Of the **853** children who were unable to write, **211 (24%) wrote for the first time.** (They ranged in age from 4 years 4 months to 37 years 8 months.)

HEALTH

Of the **1,900** children who were on the program for 12 months or more, **539 (28%) achieved perfect health for at least 12 consecutive months.** Of these, **203** had no illness for more than 24 months, and **one** had no illness for 13 years 3 months.

DETOXIFICATION

Of the **811** children who were on anticonvulsant medication, **514 (63%) were completely and successfully detoxified.** (They ranged in age from 10 months to 33 years 1 month.) Of the remaining 297 children, 25 are in the process of complete detoxification.

GRADUATION TO LIFE

Forty-eight children were graduated to life by The Institutes staff. (They ranged in age from 12 months to 28 years 3 months.)

FULL GRADUATION

Eighteen children were graduated from the Home Program. (They ranged in age from 6 years 2 months to 17 years 5 months.)
